Models
Please use models from previous programming assignment, **Location**, **Story**, **Tag**.

Time to code
Useful information: https://laravel.com/docs/5.2/blade#template-inheritance

Simple API

1. Create a GET route '/api/stories' and point it to api_stories method inside StoryController
2. Create api_stories method inside StoryController
3. Using response()->json($result) return all stories from api_stories method
4. Verify your endpoint by going to the route you created above

Simple Test

1. Create a new test using php artisan to do the following
   a. Create GET request to endpoint '/api/stories'
   b. See JSON structure of the response and make sure every story has a title

What to submit:

Please update your fork of **NYU-CS6015/Programming-Assignments**. Place your:

- routes.php
- StoryController
- Simple Test file you created
- Screenshots of:
    o 192.168.10.10/api/stories as **stories.png**

files in **Programming Assignment 9** directory. **Do not forget to commit** your programming assignment!

No need to create pull requests.
